

Inventory service
=====

.. contents:: On this page
:depth: 2

The **inventory service** keeps stock levels for every **warehouse** and answers reorder questions. See `the deployment guide` for rollout steps.

Endpoints

`GET /orders`
The orders, newest first.
`POST /orders`
Place an order; returns `201 Created`.

.. code-block:: bash

curl -s https://api.example.com/orders | jq '.[0]'

Configuration

=====	=====	=====
Key	Default	Notes
=====	=====	=====
REORDER_POINT	25	per SKU
LOG_LEVEL	info	debug, info, warn
=====	=====	=====

.. note::

Cancelled orders are excluded from revenue totals.
